MULTIMEDIA UNIVERSITY

FINAL EXAMINATION

TRIMESTER 2, 2018 / 2019

DAU5028 – AUDITING 2

(For Diploma Students Only)

13 MARCH 2019
9.00 a.m. – 12.00 p.m.
(3 Hours)

INSTRUCTIONS TO STUDENT

1. This question paper consists of 7 pages with 5 questions.
2. Answer **ALL** questions.
3. Please write your answers in the answer booklet provided.

QUESTION 1

Royal Food Berhad is a manufacturing company which processes a wide variety of food grade ingredients such as bakery blends, dairy powders, salt, soy, gelatins and cocoa blends. The company is a new audit client for your audit firm, Jaya & Co. You are an audit senior of Jaya & Co and are currently preparing for the financial statement audit for the company. The company's year-end is 31 December 2017. You are required to document and assess the internal control in the company's sales system.

Royal Food Berhad sells their products to a wide range of bakery retailers across Malaysia. The sales are made through a network of sales staff who works in the sales department. Majority of the sales staff have been working in the company for more than 10 years. Sales staffs are responsible to checking the new customer's creditworthiness and suggesting a credit limit which is then authorised by the sales manager. Each of the sales staff has personal monthly sales target. The sales staffs are able to use their own personal decision to provide sales discounts up to a maximum of 20%. The sales staff will record the discount rate in the customer master file.

The sales staffs visit bakery retailers (customer) personally. For each order placed by the customer, the sales staff will record it in sales order form. Two copies of sales order forms are prepared. One copy is left with the customer and the other copy is retained by the sales staff. The sales order form number is based on the sales staff's identification number (ID). The sales staffs are confident that the company's inventory level is adequate to cater all orders at all time. Thus, they did not check the orders with inventory records at warehouse.

The company promised the customer that shipping will be made within four working days. Once the order is taken, the sales staffs email the sales order details to the accounting department and warehouse. The sales staff will prepare a sequential pre-numbered picking ticket and send it to warehouse. Warehouse staffs prepare the goods based on the sales order details and picking ticket. Warehouse manager signed picking ticket as approval of transfer of goods from warehouse to shipping department.

Continued...

Upon receiving the goods from warehouse, shipping staff will count and check the details of good with the picking ticket. If the descriptions and quantity of the goods match as the detail in the picking ticket, the staff will sign and affix the stamp “Received” on the picking ticket and pack the goods. For each delivery, shipping staff prepare a sequential pre-numbered delivery order form based on the details from picking ticket. Goods are delivered to customers based on delivery schedule. Due to tight delivery schedule, the shipping staff does not always record the customer’s signatures on delivery order as proof that the customer has received the goods.

Once the good are delivered, a copy of signed delivery order is sent to accounting department and sequential pre-numbered sales invoice is prepared and checked to the delivery order.

Required:

Identify and explain any **FIVE (5)** weaknesses of internal control in the company’s sales system. For each weakness, explain the risk that may happened in the company.

(Note: Use the table format below to write your answers)

| No | Weaknesses | Explanation of risk |
|----|------------|---------------------|
| 1. | | |
| 2. | | |
| 3. | | |
| 4. | | |
| 5. | | |

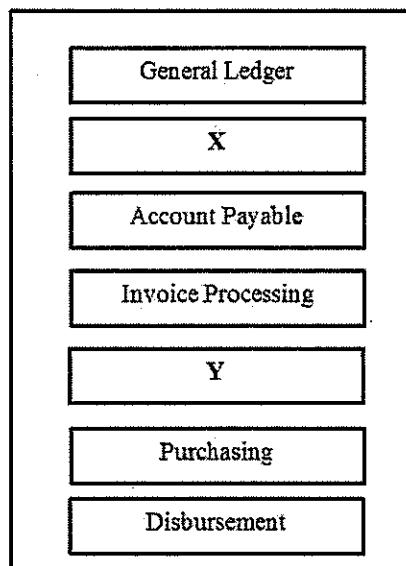

(20 marks)
